

AZOMITE® Trace Mineral Product

AZOMITE® Trace Minerals help remineralize nutrient-depleted soils

PREMIUM PRODUCT

A volcanic ash deposit, this unique natural product is mined in the desert of Central Utah. AZOMITE® is a multi-use product that can be used to improve root systems, yields and general plant vigor in a variety of applications; from field crops and orchards to lawn and garden use.

AZOMITE® has been used in sustainable agriculture for over 70 years and is OMRI Listed as acceptable for use in certified organic growing. AZOMITE® is odorless and will not burn plants.

ENVIRONMENTALLY FRIENDLY

The use of AZOMITE® in farming operations contributes to soil tilth and plant vigor. AZOMITE® is mined from a unique deposit in Utah. It is ground to specific sizing and contains no chemical or synthetic additives.

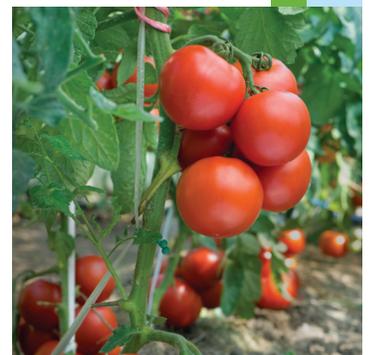

EASY TO APPLY

AZOMITE® is available in micronized and granular grades. Granulated AZOMITE® can be blended with other fertilizers. Both grades can be applied through conventional fertilizer spreaders, incorporated into soil mixes, and blended with compost.

Refer to package directions or contact Bridgewell Agriculture for proper crop application intervals and rates. Always perform a soil test prior to applying any fertilizer product.

PERSONALIZED SERVICE

Packaging options include 44# bags and bulk bags, available in truckloads and pallet quantities. Pallet lots are available from our warehouse in Stockton, CA. With our personalized service, you can be assured that AZOMITE® gets to you when you need it.
